Closed loop on personal weaknesses + summer vacation preview P6

P5 Summary of the whole year's traplearn journey · Personalized weakness analysis · P6 Outlook · 10 questions connecting practice

Positioning of this class: The last class of P5 (second semester of Primary 5) - closed-loop summary + summer connection

Core content:❶ P5 full-year trap learning journey summary table ❷ Personalized weakness analysis ❸ Summer preview P6 plan ❹ P6 forward-looking motivation

Pre-review: All contents of class 1-39, 4 SSPAsimulations (L11/L19/L29/L37), 10 traps (L38)

The goal of this class: Closed loop P5 learning loopholes → Be confident to face SSPA→ Get a head start on summer vacation preview P6

Student Name:	Class:	Date:	SSPA goals:

Section 1: P5 full-year traplearn journey summary table

Looking back on a year: From the time I was unfamiliar with "multi-digit place value" at the beginning of primary school 5, to today when I can confidently write all 10 trap formulas - this is an amazing journey.

period	Hall times	learning topics	core trap	my mastery (Self-evaluation 1-5★)	simulation score
Last semester - first half (multiple digits · estimating · area · fraction)					
September	L1-L2	Multi-digit understanding and estimation	T1 bit value, T8 estimated bit	___★	**Simulation 1 L11 ___/100**
September-October	L3-L6	Area (parallelogram, triangle, trapezoid, polygon)	T4 area ÷ 2, T5 height ≠ hypotenuse	___★	
October-November	L7-L10	Fractions (comparison, addition, subtraction, multiplication, w ord problems)	T9 direct addition w ith different denominators	___★	
First semester - second half (Decimals · Algebra · Equations)					
November-December	L12-L13	Multiplication of decimals, approximations and applications	T6 number of decimal places	___★	**Simulation 2 L19 ___/100**
December	L14-L15	Recognition of algebraic expressions and application of equations	T3 Equation Shift and Sign Change	___★	
December	L16-L18	Comprehensive review + trap review	T7 Cross-topic synthesis	___★	
SSPA practice exam (last semester)					
December	L11	SSPA Mock Exam (1) – 50 minutes	Range: L1-L10	Score: ___/100 | Part A___ Part B___ Part C___	
January	L19	SSPA Mock Exam (2) – 75 minutes full semester	Range: L1-L18	Score: ___/100 | Part A___ Part B___ Part C___	
Next semester (circle · solid · origami · volume · comprehensive)					
February-March	L21+	Understanding of circles, three-dimensional sections, origami patterns	T5 graphics extension	___★	**Simulation 3 L29 ___/100**
March-April	L22+	Volume, multi-digit advanced, decimal fraction synthesis, SSPA general review	T2 order of operations, T10 unit/reduction	___★	**Simulation 4 L37 ___/100**
Ultimate preparation					
May	L37	SSPA Mock Exam (4) Ultimate Reality	Comprehensive throughout the year	___★	**___/100**
May	L38-L39	Summary of formulas + pre-exam strategies	T1-T10 all	___★	——

P5 full year summary	**10 major traps all covered**	**Average:___★**	**Simulated average score: ___/100**

L40 · Closed loop on personal weaknesses + summer vacation preview P6 · Lam Fung Academy | Continued on next page

Section 2: Personalized weakness analysis (based on 4 SSPA Mock Exams)

🟢 My strengths (keep it up!)

Please fill in the categories with the highest score among the 4 simulations:

Category: __________ | Representative trap: T___ | Simulated average scoring rate: ___%

Strategy: This is the area where you are most confident. Do this type of questions first during SSPA to build confidence and rhythm!

🟡My middle term (needs to be consolidated)

Please fill in the categories with the average scoring rate in the 4 simulations:

Category: __________ | Representative trap: T___ | Simulated average scoring rate: ___%

Strategy: Review the lecture notes in the Correspondence Hall, especially "Trap Detonation Examples". Do 3-5 exercises of the same type.

🔴 My weaknesses (must be overcome before SSPA!)

Please fill in the category with the lowest score among the 4 simulations:

Category: __________ | Representative trap: T___ | Simulated average scoring rate: ___%

Action Plan (to be completed prior to SSPA):

1. Review the "Trap Detonation Example" in the lecture notes of the corresponding hall (page X of Hall XX)
2. Recite related formulas (see L38 formula summary)
3. Do 10 targeted exercises in this category (challenge level questions of L17/L18 can be used)
4. Mark this trap in L38 "Trap Tracking Table" and be careful when ensuring SSPA

Section 3: Summerpreview P6 Plan

P5 is about to end, and P6 is the most important year for sub-examination. Summer preview gives you a head start when P6 starts.

Multi-digit advanced

P5: Within one million levels
P6: billion level, multiple decimal places
Summer vacation preview: Practice reading and writing 9-digit and multi-digit decimal comparisons

percentage

P5: Interchange fractions and decimals
P6: Percentage calculation, discount, interest
Summer vacation preview: Recognize the "%" symbol and exchange fractions↔decimals↔percents

circle area

P5: Understanding of circles and circumference
P6: Circle area formula πr^2
Summer vacation preview: Remember the formula and distinguish the circumference ($C=2\pi r$) and area ($A=\pi r^2$)

Summerpreview plan (recommended 2 times per week, 30 minutes per time)

Weekly	date	Preview content	practise	Complete ✓

Week 1	Mid July	Multi-digit advanced: 9-digit reading and w riting, multi-digit decimal comparison	10 questions	
Week 2	end of july	Multi-digit Advanced: Approximate Values to Hundreds of Digits	10 questions	
Week 3	early August	Introduction to Percents: Fractions → Decimals → Percent Interchange	10 questions	
Week 4	mid-august	Percent application: discount calculation (20% off = ×80%)	10 questions	
Week 5	end of august	Area of a circle: formula $A=\pi r^2$, distinguishing the circumference and area of a circle	10 questions	
Week 6	end of august	P5 Trap Review (To prevent forgetting during the summer vacation!)	Mixed 15 questions

Section 4: P6 Preview - Inspiration + Expectation

"Congratulations on completing the full-year P5 course!
Pre-exam strategies from L1 multi-digit to L39,
You have gone through 40 classes, 4 mock exams,
Mastered 10 SSPA trap tips.
This is not the end, but the starting point of P6's glory. "

What kind of year is P6?

P6 = The most important year for sub-test submission. P6 SSPA scores in the previous semester directly affect secondary school placement.

The good news is: The "trap immunity system" you established in P5 can be carried directly to P6. The traps of T1-T10 also appear in P6 - only the numbers are larger and the questions are deeper. But you already know how to avoid them.

P6 new challenges: Percent applications (discount, interest, profit and loss), circle area, velocity, simple probability. These may seem new, but you are already proficient in the core mathematical thinking (formula substitution, equation solving, step-by-step disassembly) in P5.

Summer vacation is the best time to overtake: By previewing for 30 minutes every day, you will be "prepared" when P6 starts, instead of starting from scratch.

Section 5: Three-year journey of a trap hunter

From the first encounter with traps in P4, to system training in P5, to becoming a true "trap hunter" in P6 - this is a three-year journey of growth.

grade	hunter level	core competencies	landmark achievement	Finish
P4 **Hunter's Apprentice**	⭐ Trainee Hunter Trap Apprentice	Begin to recognize basic math pitfalls: · Basic operations of addition, subtraction, multiplication and division · Area of simple shapes (square, rectangle) · Initial exposure to the concept of fractions	Complete P4 course Recognize 3-5 basic traps	☐
P5 **trapper**	⭐⭐⭐ Trap Hunter Trap Hunter	Systematic trap immunity training: · Top 10 traps (T1-T10) · 4 SSPA simulations · Trap tracking table self-diagnosis · Check three techniques (substitution, reverse, estimation)	Complete 40 P5 lessons Master all 10 trap tips 4 simulations completed	☐
P6 **Master Hunter**	⭐⭐⭐⭐⭐ Trap Master Trap Master	Pitfalls for Intuitive Automation: · Automatically identify traps when seeing questions · P5 trap + P6 new trap comprehensive coverage · Passed SSPA with high scores → Ideal Middle School · Become a "trap mentor" for junior students	SSPA Mathematics Level A Admission to your favorite secondary school Help fellow students avoid traps	☐

My hunter progress bar:

P4 ✓ P5 ✓ P6 →

Hunter level: Apprentice Hunter → Trap Hunter → Trap Master(P6 target)

Section 6: P5→P6 connecting practice (total 10 questions)

The following 10 questions are a mix of P5 review questions (consolidation) and P6 preview questions (challenge). marked with P5 is a compulsory question, marked with P6 preview are challenge questions for extra points.

#	Question	type	Working Space (complete step)
1	P5 The number 12,340,000 is expressed in "ten thousand" =?	T1 morenumber of digits	
2	P5 Triangle base=18 cm, height=7 cm. Area = ?	T4 area	
3	P5 Calculation: $\frac{5}{6} + \frac{3}{4}$ = ? (Answers should be simplified)	T9 fraction	
4	P5 Solve the equation: $3x + 7 = 2x + 12$ · x = ?	T3 equation	
5	P5 The upper base of the trapezoid = 8 cm, the lower base = 14 cm, and the area = 88 cm². High=?	T4+T3	
6	P5 The radius of a circle = 14 cm. Circumference=? (Take π=22/7)	circle week	
7	P6 Preview Convert $\frac{3}{8}$ into a percentage. Tips: First convert to decimal 3÷8=0.375, then ×100%	P6 hundred fraction	
8	P6 Preview Apiece of clothing is priced at $250. How much will it sell for after a 20% discount? Tips: 20% off = ×80% = ×0.8	P6 discount	
9	P6 Preview The radius of a circle = 7 cm. Circle area =? (Take π=22/7) Tips: A=πr². Be careful to distinguish the circumference of a circle (C=2πr) and the area of a circle (A=πr²)!	P6 circlearea	
10	P6 preview Xiao Ming has $500. Use 30% to buy books and the remaining 25% to buy stationery. How many dollars are left at the end? Tip: Refer to the "baseline tracking" trap in P5 - be careful of the "leftovers"!	P6 comprehensive	

These 10 questions are your bridge from P5→P6.
After completing them, you have taken the first step in P6.
See you in the summer! P6 Let's go on a hunt together – hunting all the math traps! □

Section 7: P5 full-year trapComprehensive Reviewpractice (35 questions · classified by trap)

The following 35 questions cover the essence of the top 10 traps in P5 throughout the year. Each question is marked with the corresponding trap number (T1-T10) to facilitate you to locate your weaknesses.

morenumber of digitstrap (T1 unit and carry) · total 5 questions

#	Question	trap	
Q1	Write: 900,700,800 =? (be careful with the 0 position)	T1	
Q2	Read the Chinese pronunciation of 60,005,040. How many "zeros" do you need to read?	T1	
Q3	Round 23,456,789 to the nearest million. Result = ?	T1+T8	
Q4	Use 1, 0, 0, 0, 2, 0, 0, 3 to form the smallest eight-digit number that reads "two zeros".	T1	
Q5	Compare sizes: 5,030,000 and 5,003,000 and 5,000,300. Arrange from largest to smallest.	T1	

areatrap (T4+T5) · total 8 question

#	Question	trap	
Q6	The base of the parallelogram is 14 cm, the hypotenuse is 10 cm, and the height is 8 cm. Area = ? (If you use a hypotenuse, you'll get tricked!)	T4	
Q7	Triangular base 18 cm, height 7 cm. Area = ? (Points will be deducted if you forget ÷2!)	T5	
Q8	The upper base of the trapezoid is 7 cm, the lower base is 13 cm, the hypotenuse is 10 cm, and the height is 5 cm. Area = ?	T4	
Q9	Rectangle 3 m × 2 m. Area = ? cm^2 (convert the unit first!)	T5	
Q10	Square perimeter 40 cm. Area = ? (Cannot be directly substituted into the perimeter!)	T4+T5	
Q11	The trapezoid has an area of 66 cm^2, a height of 6 cm, and the upper base is 4 cm less than the lower base. Find the upper and lower bases.	T4	
Q12	The L shape is divided into A (10×4 cm) and B (6×5 cm). Total area = ?	T5	
Q13	Large rectangle 16×12 cm, cut out 8×5 cm rectangle in the middle. Remaining area = ?	T5	

fractiontrap (T9 different denominator direct add) · total 6 questions

#	Question	trap
Q14	$\frac{3}{5} + \frac{2}{7}$ =? (different denominators must be common denominators!)	T9
Q15	$\frac{7}{8} - \frac{2}{3} = ?$	T9
Q16	$\frac{2}{3} + \frac{1}{4} - \frac{1}{6} = ?$	T9
Q17	Comparing $\frac{5}{6}$ and $\frac{7}{9}$, which one is larger?	T9
Q18	$1\frac{2}{5} \times \frac{5}{8} = ?$	T9
Q19	There are 90 candies in a box. $\frac{1}{5}$ is red, $\frac{1}{3}$ is green. How many fewer grains does red have than green?	T9

algebraic equationtrap (T3 order of operations) · total 5 questions

#	Question	trap
Q20	Simplify: $5a - 3 + 2a + 7 = ?$	T3
Q21	Simplify: $3(2x - 4) - 2(x + 1) = ?$ (Note the negative sign assignment!)	T3
Q22	Solve the equation: $4(x - 3) = 2x + 8$	T3
Q23	3 times a number plus 7 is equal to 4 times minus 5. This number = ?	T3
Q24	The length of a rectangle is 6 cm more than its breadth, perimeter = 44 cm. Find the area of the rectangle.	T3+T5
