#	題目	答案	類型
1	Write the reciprocal of $\frac{23}{100}$. The countdown.	—	manual
2	Write what are the reciprocals of $\frac{15}{34}$ and $\frac{52}{1}$. What are the reciprocals of	—	manual
3	Convert $\frac{213}{100}$ into an improper fraction.	—	manual
4	Calculation: $34 \times 12 = ?$ and reduce the results. (Review multiplication of fractions)	408	auto
5	$23 \div 2 = ?$	11.50	auto
6	$58 \div 5 = ?$	11.60	auto
7	$47 \div 3 = ?$	15.67	auto
8	$910 \div 6 = ?$	151.67	auto
9	$12 \div 13 = ?$	0.92	auto
10	$34 \div 12 = ?$	2.83	auto
11	$56 \div 23 = ?$	2.43	auto
12	$45 \div 310 = ?$	0.15	auto
13	$114 \div 12 = ?$	9.50	auto
14	$212 \div 113 = ?$	1.88	auto
15	$123 \div 34 = ?$	3.62	auto
16	12A pancake is divided equally among 3 people. What fraction of the pancake does	—	manual
17	A bottle of juice contains 45 liters. Pour one cup for every 25 liter. How many cups	—	manual
18	A rope is 212 meters long and cut into sections every 12 meter. How many pieces can	—	manual
19	$35 \div 3 = ?$	11.67	auto
20	$47 \div 2 = ?$	23.50	auto
21	$38 \div 14 = ?$	2.71	auto
22	$56 \div 512 = ?$	0.11	auto
23	$79 \div 23 = ?$	3.43	auto
24	$115 \div 35 = ?$	3.29	auto
25	$910 \div 35 = ?$	26	auto
26	$34 \div 23 \div 12 = ?$ (Continuous division of three fractions - calculate the first two	1.48	auto

27	$214 \div 112 = ?$	1.91	auto
△1	A rope is 312meters long. Use half of it first, and then cut the remaining14mete	—	manual
△2	A box of candy weighs34kilograms, and each18kilogram contains a small package. A	—	manual
A1	23Kilograms of sugar, one pack per19kg. How many bags can be packed?	—	manual
A2	The original water bottle contains34liters. After drinking13liters, pour the rem	—	manual
H1	$25 \div 2 = ?$	12.50	auto
H2	$38 \div 3 = ?$	12.67	auto
H3	$12 \div 14 = ?$	0.86	auto
H4	$34 \div 13 = ?$	2.62	auto
H5	$710 \div 25 = ?$	28.40	auto
H6	$112 \div 12 = ?$	9.33	auto
H7	$213 \div 114 = ?$	1.87	auto
H8	There are35liters in a bottle of orange juice. Pour a small glass for every320li	—	manual
