

 答案冊 • LF-P5-S2-L27_Composite_three-dimensional_drainage_

✅ 自動解答：39/55 (71%) | ⚠️ 需手動：16 題 | 原講義：LF-P5-S2-L27_Composite_three-dimensional_drainage_method.html

#	題目	答案	類型
1	Cuboid $8 \times 6 \times 4$ cm. Volume = ?	48	auto
2	The side length of the cube is 5 cm. Volume = ?	—	manual
3	A rectangular water tank is $20 \times 15 \times 10$ cm. How many cm^3 can it hold at most?	300	auto
4	Calculation: $12^3 = ?$ (i.e. $12 \times 12 \times 12$)	144	auto
5	How would you calculate the volume of an L-shaped solid (consisting of two cuboi	—	manual
Example 1	T-shaped composite three-dimensional: lower layer $12 \times 8 \times 3$ cm, upper layer (standi	96	auto
Example 2	Ladder-shaped three-dimensional (three layers): bottom layer $10 \times 5 \times 2$ cm, middle l	50	auto
Example 3	Use the complement method to find: A cuboid is $8 \times 6 \times 5$ cm, and the upper right cor	48	auto
6	L-shaped solid: bottom layer $8 \times 5 \times 2$ cm, upper layer on the right side $3 \times 5 \times 3$ cm. T	40	auto
7	T-shaped three-dimensional: lower width $14 \times 6 \times 3$ cm, upper vertical (center) $4 \times 6 \times 5$	84	auto
8	Cuboid $10 \times 8 \times 6$ cm, with one corner cut off ($4 \times 4 \times 3$ cm). Remaining volume = ?	80	auto
9	Cross-shaped composite solid: horizontal cuboid $20 \times 5 \times 3$ cm, vertical cuboid $5 \times 12 \times$	100	auto
10	The composite solid is composed of cube A (side length 8 cm) and cube B (side le	—	manual
11	Glue 3 identical cubes (side length 4 cm) in a row. The total volume of the comp	—	manual
Example 4	The water tank is $25 \times 10 \times 15$ cm, and the original water depth is 5 cm. After addin	250	auto
Example 5	The bottom area of the water tank is 200 cm^2 , and the original water depth is	—	manual
Example 6	The water tank is $30 \times 20 \times 20$ cm, and the original water depth is 8 cm. Place an ob	600	auto
12	The water tank is $15 \times 10 \times 12$ cm, and the original water depth is 3 cm. The water l	150	auto
13	The bottom area of the water tank is 150 cm^2 , and the original water depth is	—	manual
14	The water tank is $40 \times 25 \times 30$ cm, and the original water depth is 10 cm. Place an o	1000	auto
15	The side length of the cube water tank is 20 cm, and the original water depth is	—	manual

Example 7	The water tank is $15 \times 10 \times 8$ cm, and the original water depth is 5 cm. Place an obj	150	auto
Example 8	Water tank $30 \times 20 \times 15$ cm, water depth 12 cm. Place a cube of iron with a side leng	600	auto
16	The water tank is $20 \times 10 \times 10$ cm, and the original water depth is 7 cm. Place an ob	200	auto
17	Water tank $25 \times 20 \times 12$ cm, water depth 10 cm. Place an object with a volume of 800	500	auto
18	L-shaped solid: bottom layer $6 \times 4 \times 2$ cm, upper right side $2 \times 4 \times 3$ cm. Total volume =	24	auto
19	The water tank is $20 \times 10 \times 15$ cm, and the original water depth is 5 cm. The water l	200	auto
20	Cuboid $15 \times 10 \times 8$ cm, with one corner cut off ($5 \times 5 \times 4$ cm). Remaining volume = ?	150	auto
21	The bottom area of the water tank is 120 cm^2 , and the original water depth is	—	manual
22	Water tank $18 \times 12 \times 10$ cm, water depth 8 cm. Is there room to put another object wi	216	auto
23	Compound solid: cube A (side length 6 cm) is placed on top of cube B (side lengt	—	manual
24	The water tank is $30 \times 20 \times 25$ cm, and the original water depth is 10 cm. Place an o	600	auto
25	The side length of the cube water tank is 15 cm and the water depth is 10 cm. Pl	—	manual
26	Water tank $24 \times 16 \times 18$ cm, water depth 14 cm. Place a cube with side length 6 cm. O	384	auto
27	An empty water tank $20 \times 15 \times 12$ cm. First, 2400 cm^3 of water is injected, and then	300	auto
28	5x5Square8x5x3Connected cuboids5x5SquareA U-shaped composite solid (there is a c	25	auto
29	Water tank $50 \times 30 \times 40$ cm, water depth 25 cm. Place object A (volume 9000 cm^3) firs	1500	auto
30	The rectangular water tank is $30 \times 20 \times 15$ cm and the water depth is 10 cm. First re	600	auto
31	An L-shaped planter consists of two parts: the bottom layer is 100 cm long, 40 c	—	manual
32	The internal length of a rectangular fish tank is 50 cm, the width is 30 cm, and	—	manual
33	A rectangular water tank is $40 \times 25 \times 20$ cm with a water depth of 15 cm. A stone wit	1000	auto
34	The side length of the cube water tank is 20 cm, and the original water depth is	—	manual
35	The inside of a water tank is 60 cm long, 40 cm wide, and 30 cm high. There is w	—	manual
36	A composite solid consists of a cuboid ($20 \times 10 \times 8$ cm) and a cube (side length	200	auto
37	Water tank $35 \times 25 \times 18$ cm, water depth 12 cm. After dropping an irregular stone blo	875	auto
 1	Water height=hFull! 15cmWater tank $30 \times 20 \times 15$ cm. First inject some water to a dep	600	auto

 2	Side length 10cmSide length 7cm4cmA composite solid is formed by stacking three	—	manual
 3	A:h=10B:h=71200cm ³ →Tank A (30×20×15 cm, water depth 10 cm) and tank B (25×15×12	600	auto
H1	L-shaped three-dimensional: bottom layer 10×6×4 cm, upper right side 4×6×3 cm. T	60	auto
H2	The water tank is 25×12×15 cm, and the original water depth is 6 cm. The water l	300	auto
H3	Water tank 20×15×10 cm, water depth 8 cm. Place an object with a volume of 500 c	300	auto
H4	Cuboid 18×12×10 cm, with one corner cut off (6×4×5 cm). Remaining volume = ?	216	auto
H5	The side length of the cube water tank is 18 cm and the water depth is 12 cm. Pl	—	manual
H6	Water tank 40×20×25 cm, water depth 15 cm. First put in stone A (volume 3000 cm ³	800	auto
H7	An empty water tank 30×20×18 cm. Pour 6 L of water (1 L = 1000 cm ³) and place a	600	auto
