#	題目	答案	類型
1	Convert 0.5 into a fraction (simplest form)	—	manual
2	Convert 34 into decimal	—	manual
3	Calculate $0.25 + 12 = ?$ (Tip: unify the format first)	12.25	auto
4	Calculate $35 \times 0.2 = ?$ (Tip: Multiply in a unified format)	7	auto
5	Judgment: $13 + 0.5$ Should the fraction be converted first or the decimal converted	13.50	auto
Example 1	$0.75 + 14 = ?$	14.75	auto
Example 2	$35 + 0.2 = ?$	35.20	auto
6	$14 \times 0.8 = ?$	11.20	auto
7	$0.6 \times 56 = ?$	33.60	auto
8	$38 \div 0.25 = ?$	152	auto
9	$0.4 \div 25 = ?$	0.02	auto
10	$12 \times 0.125 = ?$	1.50	auto
11	$0.3 + 12 \times 0.4 = ?$	4.80	auto
12	$23 \times 0.75 + 0.25 = ?$	17.25	auto
13	$0.5 + 13 = ?$	13.50	auto
14	$12 + 0.25 = ?$	12.25	auto
15	$0.75 + 18 = ?$	18.75	auto
16	$310 + 0.4 = ?$	310.40	auto
17	$0.2 + 25 = ?$	25.20	auto
18	$14 \times 0.6 = ?$	8.40	auto
19	$0.8 \times 34 = ?$	27.20	auto
20	$56 \div 0.5 = ?$	112	auto
21	$0.3 + 14 \times 0.8 = ?$	11.20	auto
22	$12 \times 0.6 + 0.25 = ?$	7.20	auto
23	$1.25 - 14 \div 0.5 = ?$	28	auto
24	$(0.5 + 13) \times 0.6 = ?$	13.50	auto

25	$0.75 \times 23 + 16 = ?$	17.25	auto
26	$34 \div 0.25 + 0.5 \times 13 = ?$	136	auto
27	$1.2 \times (56 - 0.25) = ?$	—	manual
28	$(0.6 + 15) \div (12 - 0.1) = ?$	15.60	auto
29	$0.125 + 38 \times 0.4 - 110 = ?$	15.20	auto
30	A pencil 12 yuan, Xiao Ming bought 0.6 pieces (billed on a pro-rata basis). How much	—	manual
31	Recipe requires 34 kg flour and 0.25 kg sugar. How many kilograms do the two materials	—	manual
32	A ribbon is 2.5 meters long and uses 14 to make a bow. How many meters of ribbon will	—	manual
33	A jacket, originally priced at \$360, is 25% off (0.75). In addition, use members	—	manual
34	Recipe: Cake requires 23 cups of milk. How many cups of milk are needed if only 0.	—	manual
35	The engineering team completed the project in one day SEP . After 0.5 days,	—	manual
36	The water bottle originally contained 0.75 liters of water. After drinking 13 liters	—	manual
1	$(0.75 + 16) \div (23 - 0.25) \times 1.2 = ?$	16.75	auto
2	A water tank has a capacity of 5 liters. The first injection of 14 is 0.8 of the capacity	—	manual
3	Three stores: store A's discount is SEP , store B's discount is 0.65, and store C's	—	manual
H1	$0.5 + 14 = ?$	14.50	auto
H2	$25 + 0.3 = ?$	25.30	auto
H3	$34 \times 0.4 = ?$	13.60	auto
H4	$0.6 \div 35 = ?$	0.02	auto
H5	$0.3 + 12 \times 0.4 = ?$	4.80	auto
H6	A kettle holds 1.5 liters of water and uses SEP . How many liters of water	—	manual
H7	$(0.5 + 16) \times 34 = ?$	16.50	auto
H8	Compare 23×0.75 and $0.6 \times SEP $, which is larger? How much difference? 56 Which	17.25	auto
H9	An item costs \$240, first add 14 (i.e. $\times 1.25$), and then get a 15% discount (0.85).	—	manual
